* Terms and Conditions:

Thomson Reuters determines a reasonable amount of data to download by comparing your download activity against the average annual download rates for all Thomson Reuters clients using the product in question. Thomson Reuters determines an insubstantial portion of downloaded data to mean an amount of data taken from the product which (1) would not have significant commercial value of its own; and (2) would not act as a substitute for access to a Thomson Reuters product for someone who does not have access to the product.

You are not entitled to do anything that would cause a breach of the terms of the agreement between your organization and Thomson Reuters, such as (1) allowing anyone else to use your username/password, (2) downloading excessive amounts of data, (3) providing data to anyone else, other than in licensed, source-acknowledged documents or reports created as part of your normal work, (4) archiving or using downloaded data to create a derivative database or metrics, (5) using the product or any downloaded data to provide services to anyone outside your organization, or (6) using the product in a way that risks damaging, disabling, overburdening or impairing the operation of the product, or any other person's use or enjoyment of the product.

I have read and agree to these terms and conditions.

In order to create and access your EndNote Web Library, you must sign in or register.

Benefits of creating an EndNote Web Library:

- You can add references to your EndNote Web Library directly from Web of Science and other Web of Knowledge products.
- You can organize references in folders for access and use at any time--collections are retained between sessions.
- You can create formatted reference lists in a variety of publishing styles.
- You will be able to access your EndNote Web Library from any computer at the institution.

Processing Records

Please wait while your request is processed.
(Note: Depending on the number of records, this may take a few moments.)

Product: Web of Knowledge
Selected custom save My EndNote Web Library

Processing 4 records:
4...Done.

- We are contacting your EndNote Web library...
- The records are being sent to your EndNote Web library. They may take a few moments to get there.

Swine influenza virus¹ is common throughout pig populations worldwide. Transmission of the virus from pigs to humans is not common and does not always lead to human influenza, often resulting only in the production of antibodies in the blood. If transmission does cause human influenza, it is called zoonotic swine flu. People with regular exposure to pigs are at increased risk of swine flu infection. The meat of an infected animal poses no risk of infection when properly cooked.

During the mid-20th century, identification and diagnosis of transmission to humans. Since 1968, several new strains of swine flu have emerged. These strains of swine flu rarely pass from humans to humans. Swine flu viruses are similar to those of influenza and of influenza-like illness in general, namely chills, fever, sore throat, muscle pains, severe headache, coughing, weakness and general discomfort.
