## Egyptian Universities' Libraries Consortia (EULC)

The major goal of the consortia is to provide interactive information services to the Egyptian scholars and students. All the consortia services are electronically available through the EULC portal. Accessing information resources and services through one unified portal would help the Egyptian universities' libraries to eliminate the overlap and duplication of resources and efforts, which would facilitate optimum methods for effectively and efficiently using the allocated resources

### EULC Projects

- [1. Digital Library Consortia](#) — The main objective of this project is providing access to the international electronic resources including citations, abstracts and full text database; beside E-journals, books, transactions and engineering standards. All these E-resources are searchable through one unified portal and individually through their interfaces.
- [2. Egyptian University Libraries Automation](#) — The objective of this project is automating the Egyptian universities' libraries. (EUL) through building a union catalog for their holdings. The union catalog will facilitate achieving more cooperation and resources sharing among all the members of the EULC.
- [3. Future Library System Development](#) — The ICTC in EL-Mansoura and EL-Zagazig Universities have built and implemented a library automation system. The EULC cooperates with the ICTC to enhance and develop the system using an international list of specifications. The project objective is to standardize the system to cope with the international standards of library automated system and to generalize it in the automation of the EULC.
- [4. The Electronic Theses and Dissertation Database](#) — The objective of this project is building a national database for the awarded theses and dissertation from the Egyptian universities, besides building a task force for the electronic theses and dissertations metadata standard (ETDMS) which would allow the higher education researchers a full submission of their theses to the system using an international electronic standard format.

### Resource of the Month

Evidence-Based Medicine Reviews (EBMR)  
A definitive resource for electronic information in the evidence based medicine (EBM) movement that combines 7 of the most trusted EBM resources into a single, fully-searchable database. EBMR helps clinicians practice EBM through a combination of resources that provide: systematic reviews of topics; article reviews; and access to definitive controlled trials. And only with EBMR on Ovid can you get comprehensive integration with MEDLINE.
